

DON'T BE CAUGHT IN THIS SITUATION!

A large percentage of Arkansas' hunting accidents each year are tree stand related. The following are some safety measures which apply to tree stands:

- Inspect and clean out tree stands before hunting season.
- Make sure all steps, railings and floorings are in good shape.
- Use a "haul line" to raise or lower (unloaded) firearms after you have gotten into the stand safely.
- Use a safety belt to prevent accidental falls.

Have a safe and enjoyable hunting season!
